

Chug a Chaga and Lighten Up!

Los Angeles, CA. – February 9, 2009 – Sayan Health, the manufacturer of the super antioxidant beverage Sayan Chaga, is pleased to announce the launch of a calorie-free version of its health drink. To celebrate its expansion into the calorie-free market, Sayan Health will also unveil a new bottle and label design in May that will showcase what sets the beverage apart from the pack.

Although zero-calorie drinks have been around for ages, Sayan Chaga is one of the very first beverages of its kind to enter the market. In addition to its great taste and calorie-free formulation, a myriad of healthful benefits can be derived from drinking Sayan Chaga. At the same time, the unsweetened version will maintain the all-natural, caffeine- and gluten-free formulation of its original blend.
